

Do not weaken the present NJ Do Not Call List Law. If anything I would like a similiar law to cover fax machines. I presently get so many junk faxes that it clogs up my line and uses my ink and paper. I am constantly calling the number removal numbers to be dropped from their lists and it seems that I am only spinning my wheels. Many companies don't pay any attention to my attempes and there are many companies who do not even give a removal number which is even more infuriating. What can be done for us?
